## Who We Are

---

Water for Life Charity is a 501 (c)(3) nonprofit organization that supplies water filters and drills wells in developing countries lacking clean, safe drinking water.

Our mission is to save lives, increase economic and educational opportunities, and improve health one water filter and well at a time.

---

## What We Offer & How We Deliver

---

Water for Life Charity is run by volunteers who believe in the power of clean water. Our small overhead costs are covered by corporate sponsors and we partner with aligned organizations to distribute filters so that your donations go straight to funding wells and water filters for communities and families in need.

We've distributed over 40,000 filters in 25 countries and have drilled 19 wells as of June 2026. With support from our global community, we've helped hundreds of thousands of individuals access clean, safe water. Together let's share even more water and opportunities.

**Caring has a ripple effect. Join us in bringing water to people in need. Visit [WaterforLifeCharity.org](https://www.WaterforLifeCharity.org) to learn about the world water crisis and save lives today.**
